

1. PURPOSE OF SURVEY

- Understanding user needs and expectations.
- Market research and competitor analysis.

2. SURVEY METHODOLOGY

- What do you consider the most important feature in a website/app?
- Do you prefer a simple UI or one with advanced options?
- How would you like data to be presented (list, table, cards)?
- Do you require multi-language support?
- How important are privacy and security features to you?

3. SURVEY QUESTIONS (EXAMPLES)

- What do you consider the most important feature in a website/app?
- Do you prefer a simple UI or one with advanced options?
- How would you like data to be presented (list, table, cards)?
- Do you require multi-language support?
- How important are privacy and security features to you?

4. SURVEY RESULTS

- Summary of responses (e.g., 70% of users said responsive design is important).
- Graphs/Charts (use of tools like Canva for bar charts, pie charts, etc.).

5. ANALYSIS & FINDINGS

- Key conclusions from the survey.
- Features with the highest demand.
- Which features could be considered optional or secondary.

IMPACT ON PROJECT

- What changes/additions were made to the project based on the survey.
- Future enhancements suggested by the survey.

THANK
YOU
